

private schools in the city to offer all of its students an unlimited, online tutoring service called GradeSlam. This year the school is also introducing internet-based laptops for all its students."

Centennial Academy – "We see learning through the eyes of the student"

Centennial Academy is a secondary private school that addresses and answers the needs of a specific student population. Although most enroll in Grade 7, many students transfer to Centennial midstream from both public and other private schools where they experience difficulties. At Centennial Academy, 90% of students are diagnosed with various learning challenges, yet nearly all graduates move on to CEGEP and university.

Angela Burgos, Head of School credits the philosophy and approach to learning and teaching with the success of the school. "We see learning through the eyes of the student. We help students learn how to learn and become autonomous and resilient learners through innovation and collaboration".

Centennial Academy has a diverse yet close-knit coded community of students from all across the province and all walks of life. Centennial has fewer than 200 students and a faculty that works as a team.

Teachers act as coaches helping students gain critical-thinking and problem-solving skills that prepare them for the real world. They take the focus off teaching and put it on learning.

Centennial Academy is the only high school in the province of Quebec that helps students with learning disabilities master their learning challenges and graduate on time. Incorporating physical fitness and mindfulness, Centennial provides a supportive and inclusive environment in which young people can learn, progress and succeed. A French stream is slated to open in 2017. Inquiries are welcome.

St. George's School a McGill University

Founded in 1930, St. George's School is an international, offering a private school in separate campus.

Students at St. George's learn in an environment that reflects the business of Montreal. They are designed to engage the child. Each child receives their personal best is a challenge to learn is respected and valued.

St. George's High School in their education and through an Advisor Program individual student progress. The St. George's selection of enhanced disciplines and where the skills of the scientist will be vice versa.

Head of School, Angela Burgos, following: "Recently we visited school practices visit told me that she had visited innovative schools in New York. School stood out from the rest. George's students and teachers are and interesting, open-minded and kind people she's eyes is laser-focused on creating a "partner school".

Progressive pedagogy informed the curriculum and thus, the prestigious designation "partner school".
